

IN THE CLAIMS:

Please cancel claims 4, 9, 13, 17, and 22 without prejudice to or disclaimer of the subject matter recited therein.

Please amend claims 1-3, 5-8, 10-12, 14-16, and 18-21 as follows:

LISTING OF CURRENT CLAIMS

Claim 1. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification, comprising:
a supporter comprising a slot; and
a data card comprising a memory chip, said data card for storing data, said data card ~~being plugged~~ receivable into said slot, said data card connected to an antenna wherein said antenna comprises a printed circuit board or a coiled enameled wire.

Claim 2. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 1, wherein said supporter is selected from the group consisting of MP3, mobile, watch, and belt.

Claim 3. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 1, wherein said memory chip comprises a plurality of components ~~of~~ comprising a diode and a capacitor.

Claim 4. (Cancelled)

Claim 5. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification, comprising:
a supporter comprising a plurality of slots, said supporter internally connected to an antenna, said antenna for connecting to a memory chip wherein said antenna comprises a printed circuit board or a coiled enameled wire; and
a memory chip for storing data, said memory chip being plugged into a slot, said memory chip electronically connected to said antenna by a contact on a surface of said memory chip.

Claim 6. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 5, further comprising a second slot for directly connecting to a data card having an antenna.

Claim 7. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 5, wherein said supporter is selected from the group consisting of MP3, mobile, and belt.

Claim 8. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 5, wherein said memory chip comprises a plurality of components of comprising a diode and a capacitor.

Claim 9. (Cancelled)

Claim 10. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification, comprising:

a supporter comprising a memory chip, said memory chip for storing data, said supporter comprising an antenna which is to obtain induced voltage wherein said antenna comprises a printed circuit board or a coiled enameled wire.

Claim 11. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 10, wherein said supporter is selected from the group consisting of MP3, mobile, and belt.

Claim 12. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 10, wherein said memory chip comprises a plurality of components of comprising a diode and a capacitor.

Claim 13. (Cancelled)

Claim 14. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification, comprising:

a supporter comprising a shell, wherein a memory chip and an antenna are inside said shell wherein said antenna comprises a printed circuit board or a coiled enameled wire.

Claim 15. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 14, wherein said supporter is selected from the group consisting of MP3, mobile, and belt.

Claim 16. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 14, wherein said memory chip comprises a plurality of components ~~of~~ comprising a diode and a capacitor.

Claim 17. (Cancelled)

Claim 18. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification, comprising:

a supporter comprising a shell, ~~and~~ a memory chip and an antenna, wherein said memory chip and said antenna are adhering tags adhered to said shell wherein said adhering tag is a soft circuit board and is coated with an adhering material on a surface of said adhering tag.

Claim 19. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 18, wherein said supporter is selected from the group consisting of MP3, mobile, and belt.

Claim 20. (Currently Amended) ~~A method and~~ An apparatus for radio frequency identification according to claim 18, wherein said memory chip comprises a plurality of components ~~of~~ comprising a diode and a capacitor.

Claim 21. (Currently Amended) ~~A method and~~ An apparatus

for radio frequency identification according to claim 18, wherein said antenna ~~is made of being selected from the group consisting of PCB and~~ comprises a printed circuit board or a coiled enameled wire.

Claim 22. (Cancelled)
